

June 2020's walk solved.

- 1 **Veltins** With water in solid form to your back, bank past home to the exclamation point. What goes with Frisches? (N 47.6822, W 122.3554)
- 2 **Amphibians** When you reach the house, proceed under the sign of the 18th century. Where tiles step, small groups gather. Reptiles, mammals or amphibians? (N 47.6826, W 122.3561)
- 3 **Head** At the yellow-topped Corey, pivot in the direction it's not pointing and perambulate to the next intersection. Find 865, put it behind you and proceed until three grounded digits total five. Head or tail? (N 47.6832, W 122.3593)
- 4 **3/7** At the cornered boulders, turn opposite their turn to the jeweled wall. In the yellow-bordered section, what proportion of the cubes are clear? (N 47.6837, W 122.3606)
- 5 **Rope** Power under the tallest line to the area of no-cost pharmaceuticals, then turn in the direction of the sign's wood. Below the seagull, chain or rope? (N 47.6847, W 122.3596)
- 6 **Sphere** At the next crossroads, traverse only one to walk toward the steeple. A few steps beyond where the second ahead is directly across from you, what geometric shape best describes the doubly wired tree hangers? (N 47.6859, W 122.3580)
- 7 **Skulls** Past the solarized garage, follow the wood fence all the way to the one-legged skeleton. What adorn the brim of the pumpkin's top hat? (N 47.6869, W 122.3584)
- 8 **Wings** Where twin diamonds loom large behind you, look for and follow the tallest retaining structure past the blue dinosaur into the area where all is busy. Find the walled flyer. Of what does the flyer dream? (N 47.6876, W 122.3588)
- 9 **Basketball** At the last large trunk, turn toward the end of the zone. Where side chimneys are directly across from each other, go to the fence step and look into the back yard. What sport? (N 47.6886, W 122.3580)
- 10 **1/2** Where red runs over gold, subtract the sum of the founding year digits from the number of circled cylinders, add half the number of gold hooved animals to the remainder, and divide the sum by the number of white lions. How many dozen? (N 47.6892, W 122.3582)
- 11 **Scotia** Look for the nearest blue-tinted conifer and proceed past the back of the stop and it to the rainbowed barrier makers. What republic? (N 47.6892, W 122.3569)
- 12 **Hearing** At the tree box, cut past the haze to the abandoned aid place. What sense? (N 47.6899, W 122.3554)
- 13 **Hearing** Pass under the herd to the antlers, then by the nearest numbers that total seven, to the root. What kind of loop? (N 47.6907, W 122.3562)
- 14 **Davidson** Cross to where time stands still. Roy who? (N 47.6905, W 122.3566)
- 15 **98** Beyond the king, take direction from P to its entrance. In inches, what is the clearance? (N 47.6903, W 122.3581)
- 16 **Po** Proceed as ex is to it, past the sign of love and waste. At the rock wall directional decision point, follow it to the end of the double yellow lines. Carefully cross the double yellow lines and maintain your course to the glassed pole. Dumbo or Po? (N 47.6899, W 122.3610)

- 17 **4** When you see the treehouse's dream, cross to it and past the swinging deciduous. Before you reach what John Donne posited no man is, redirect to take the shrubbiest path to the brick wall. How many monkeys? (N 47.6894, W 122.3632)
- 18 **Lions** Follow Roebuck's ex's enclosure to the crowned post. Lions, tigers or bears? Oh my. (N 47.6884, W 122.3616)
- 19 **People** Go to where it's better. Who loves them? (N 47.6883, W 122.3611)
- 20 **Rosy** Look for the three hose connectors and travel in the direction the largest points until you come to the lessons place. Who can you call for them? (N 47.6878, W 122.3608)
- 21 **Seattle** At the déjà vu intersection, cross to the only corner missing your touch and beeline past 78's white and brown gateways to turn to the XX, albeit expressed in different numerals. What goes with 96-1 and 96-2? (N 47.6855, W 122.3608)
- 22 **3** Near the molded anemometers, straddling the fence, how many bowling balls? (N 47.6855, W 122.3630)
- 23 **Play** Diagonal through what no man or, for that matter, no being is to the multi-planed stones, then follow the uninterrupted stack past the award star to the green metal box. Turn to the arch and step over the wall. Besides live and love, what do Dale and Doree advocate? (N 47.6843, W 122.3636)
- 24 **Sleeping** Leave through the columnar quad and face the pocket. Turn 540 degrees and proceed to the jacketed swan. Signwise, what is the garden doing? (N 47.6841, W 122.3617)
- 25 **South** Approaching the horizontally striped and diagonally opposed posts, turn to pass to the port of the closest one and continue past the paintless horizontal boards to the painted vertical ones. Corner with them, then find the countdown address. The animals under it, what pole? (N 47.6832, W 122.3617)
- 26 **Labrador** Rock past the cairn to the corner, then pivot to continue under the leaner until you spot xing left. Go to it. What kind of dog? (N 47.6822, W 122.3632)
- 27 **Preston's** At the squared fence, whose homestead? (N 47.6822, W 122.3621)
- 28 **Moon** Carefully cross the twin yellow lines again and climb where gravity offers its greatest challenge. In the star gate, what's not a star? (N 47.6822, W 122.4599)
- 29 **3** Continue until arrows chase their tails. Keep starboard of the trio to the unregistered little free library. How many dozen red squares in the checkerboarded chimney? (N 47.6820, W 122.23580)
- 30 **Traffic** At your next directional decision point, bisect the red circle to continue the opposite way water runs to the black bumps. Cautiously note and report what's above Logix. (N 47.6818, W 122. 3566)
